## What is eneloop?

CHANGE THE FUTURE OF OUR ENVIRONMENT  
BY CHANGING YOUR BATTERY

How many batteries are we using and throwing away every year....

What can we do to save our environment....

What is the idealistic Eco-friendly battery for the future....

This is PANASONIC's answer

**eneloop**

Represent a new life style.

It is a new battery that can be used as easily as a dry-cell battery, and reused simply by recharging it. eneloop is the new battery that might just change your lifestyle.

eneloop The next generation of environmentally friendly batteries favored by over 60 countries\* around the world proposes a new lifestyle shift from 'Disposable' to 'Reusable'. Change the future of our environment by changing your battery. \*as of Aug 2012

The advantages of the rechargeable battery and the dry-cell battery are combined into one

# Benefits

## Economic benefits

While the initial cost of rechargeable batteries is high, your investment in eneloop will be recovered after only a few recharging cycles and the long term savings are substantial. eneloop batteries can be recharged up to 2100 times.

### Comparison eneloop vs dry-cell batteries

### Comparison eneloop battery vs competition<sup>1</sup>

<sup>1</sup>IEC61951-2(7.5.1.3)

eneloop can be recharged up to 2100 times, which represents a huge economic advantage

## Ready to use

eneloop batteries are delivered pre-charged and are ready for immediate use upon purchase. There is no need to charge before use.

## Low self-discharge

While other non ready to use rechargeable batteries lose their charge over time, PANASONIC's eneloop technology enables these batteries to keep 70% of their charge up to 5 years.

eneloop is ready-to-use even after 5 years\* of storage

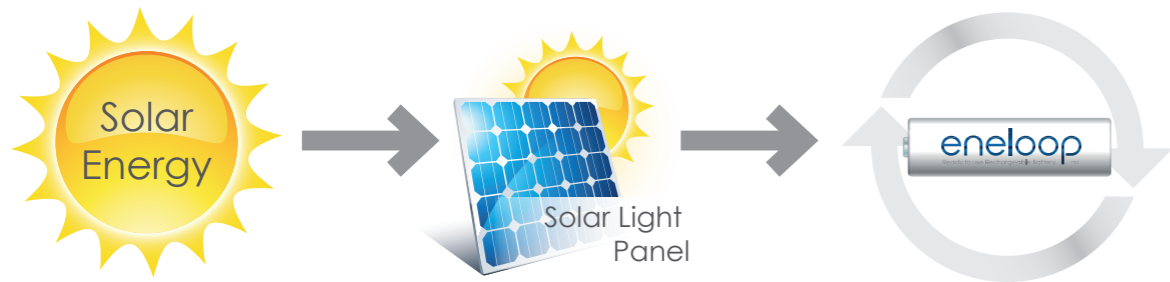

\*Panasonic internal IEC (61951-2(7.3.2)) testing. Varies according to conditions of use.

## Recyclable and Environmentally Friendly

It is estimated that over 40 billion dry-cells were disposed worldwide last year. eneloop rechargeable batteries represent renewable energy and can be charged up to 2100\* times! Using eneloop rechargeable batteries will help in the reduction of disposable waste and thus benefit the environment. Let's keep batteries out of our landfill.

\* 2100 cycle times is available for eneloop AA & AAA batteries

### Clean Energy Loop

Through the Green Power Certification System, eneloop is pre-charged by "green power" from photovoltaic generation

eneloop has a clean energy loop

## High power battery

One of the main features of eneloop is the higher voltage level. Many applications switch off or show the low battery signal if the voltage is lower than 1,1 Volt. A traditional Ni-MH battery will lose its voltage constantly and runs under this critical level very soon. eneloop however will keep the voltage level over 1,1 Volt for a long time, and only just before becoming empty will fall under that limit. That's one of the reasons why you can take more photos with eneloop.

eneloop has higher usable capacity than standard batteries

## Low temperature operations

eneloop has superior performance at 0°C and can even be used at temperature as low as -20°C.

Discharging Characteristics at 0°C (at 500mA continuous discharge)

eneloop is able to maintain a low self-discharge rate even in temperatures as low as -20°C. Operation time will be shorter than that of room temperature.

**Superior discharge at low temperature!**

**Panasonic**

## C & D adaptor - Spacers

Even though 85% of all disposable batteries sold are either AA or AAA size, there are still some applications, which require other battery sizes. The two next common sizes are C and D. Typical examples, where these sizes are required are big torches or portable radios. For these cases we offer simple but smart plastic adaptors, which transform an AA-size eneloop into a C- or D-size battery.

### HOW-TO

Plug the eneloop into the adaptor and you can use it in your equipment. Of course the adaptors only adapt the mechanical dimensions of the eneloop (length and diameter) and obviously not its electrical characteristics. The voltage and the capacity remain unchanged to the eneloop AA specification.

## Chargers

### Basic charger – BQ CC18 – For occasional users

- Can charge AA / AAA 4 cells
- Can be used all over the world(100-240V)
- Timer Control

Item	Spec
Input	AC100-240V 50-60Hz
Input part Structure	Plug-in and attachment plug
Charging output	DC 2.4V AA 250mA x 2 / AAA 120mA x 2
Charging control	Timer cut
Indicator	LED x 2 Charging: ON, Fully charged: OFF
Charger battery	AA x 2, 4 / AAA x 2, 4 cells
Charging time	AA: Approx 10 hours AAA: Approx 8 hours
Charger size (cm) (W x H x D)	6,5 x 10,5 x 7,5
Weight	87 g
Case color	white

### Advanced charger – BQ CC17 – For frequent users

- Can charge AA / AAA 4 cells
- Can be used all over the world(100-240V)
- Individual management/-ΔV Control

Item	Spec
Input	AC100-240V 50-60Hz
Input part Structure	Plug-in and attachment plug
Charging output	DC 1.2V AA 300mA x 4 / AAA 150mA x 4
Charging control	TA /Timer
Indicator	LED x 4 Charging: ON, Fully charged: OFF
Charger battery	AA x 1, 2, 3, 4 / AAA x 1, 2, 3, 4 cells
Charging time	AA: Approx 7hr [2,000mAh] AAA: Approx 6hr [ 800mAh]
Charger size (cm) (W x H x D)	6,5 x 10,5 x 7,5
Weight	91 g
Case color	white

### Smart & Quick charger – BQ CC16 – For heavy users

- Rapid Charge (AA 2cell: 2hours/4cells: 4hours)
- Individual management/Charge Control(Smart Charge<sup>1</sup>)
- Can be used all over the world(100-240V)

Item	Spec
Input	AC100-240V 50-60Hz
Input part Structure	Plug in and attachment plug
Charging output	DC1.5 V 550mA×4/275mA×4
Charging control	Smart Charge <sup>1</sup> /-ΔV /Timer
Indicator	LED x 2 Charging: ON, Full charged: OFF
Charger battery	AA x 1, 2, 3, 4 / AAA x 1, 2, 3, 4 cells
Charging time	AA: Approx 2hours/4hours [2,000mAh] AAA: Approx 1.5hours/3hours [800mAh]
Charger size (cm) (W x H x D)	6,5 x 10,5 x 7,5
Weight	97 g
Case color	white

<sup>1</sup>This charger has "Smart Charge" function which checks voltage and temperature of battery automatically. Thanks to Smart Charge function, it saves time of charging and loss of energy & money.
