

# FAST CHARGE

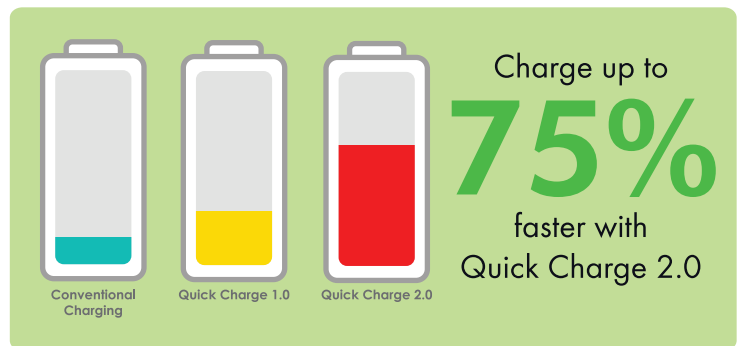

for compatible mobile devices

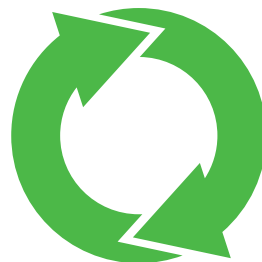

The latest smartphones and mobile devices are powered by batteries with increasingly higher capacities so conventional chargers no longer charge the device fast enough to suit a busy lifestyle.

Innovative Quick Charge (QC2.0) technology built into the latest AC & DC charge adaptors from **Enecharger** means you can fast charge QC2.0 enabled devices from empty to 60% capacity in just 30 minutes.

Here are just some of the current devices conveniently integrated with Quick Charge 2.0 technology for fast battery charging:-

Use Quick Charge 2.0's 2.4A high current charger to charge **iPhone 6 / 6 Plus, 6S / 6S Plus** up to **2.4X** faster than conventional chargers.

Quick Charge chargers and power products are backwards compatible and safe to use with older and non-QC2.0 enabled devices, while still providing a higher charge current than conventional chargers.

## THE ENECHARGER RANGE OF QUICK CHARGE 2.0 PRODUCTS HAS SOMETHING FOR EVERYONE

### FOR THE CAR

**QC2-DC1**  
USB 12/24V DC input 2.4A QC2.0 USB output. Quickly charge your device in the car before you get to a hectic day at work!

### FOR THE HOME

**QC2-AC1**  
3.0A 5V AC-DC regulated switchmode power supply QC2.0 USB output. Your phone will be ready to go by the time you're done getting ready for a night on the town!

### FOR A BOOST

**UEB-10**  
5V dual USB output 38W 8000mAh Lilon power bank. QC2.0 charging from one port, 2.4A high current charging from the second port. A portable power source in your bag whenever your phone or tablet needs a boost!

### FOR THE FAMILY

**QC2-ACDC4**
