

The best of the latest products to get you powered up

1 HOUR SUPER CHARGER + USB OUTPUT

Enecharger has a new charger in its lineup - introducing the Super Charger for 1 - 4 AA/AAA NiMH cells.

A fully automatic quick charger with 4 independent charge channels recharges up to 4 x AA 2000mAh NiMH cells in just one hour!

Plus, recharge USB powered mobile devices through the 5V 2.1A USB output port, making the Super Charger a top gift idea for friends who travel or always on the go.

Includes 100-240VAC adaptor and 12VDC car adaptor.

Model: NC42000USB

UNIVERSAL SMART CHARGER

Enecharger's Universal Smart Charger is designed to charge all common size (AAA, AA, C, D, 9V) NiMH batteries with both 100-240VAC or 12VDC input options.

Charging status for each individual charging channel is displayed on the backlit LCD screen as a handy indicator of charge time remaining.

Features:

- Charge 1-4 pcs AAA / AA / C / D size
- Charge 1-2 pcs 9V size
- Charge current: 800mA
- Charge current (for 9V): 50mA
- Negative delta V cut-off
- Short circuit and reverse polarity protection, auto faulty cell detection.

Model: NC800U

ANSMANN XXL PHONE CAR CHARGER

Simultaneously display and charge mobile devices while driving with the XXL Smartphone Car Charger for larger smartphones, featuring built in charge capabilities via 12VDC to USB 5V 1.5A max. output.

The adjustable and rotatable holder with rubber coating keeps a firm grip on the mobile device without scratching.

Includes 3 charge cables: Micro USB, Apple 30-pin and Apple Lightning.

Model: 1000-0004-1

Smartphone dimensions: min. 55 x 118mm / max. 85 x 152mm

2 CELL LiIon / NiMH CHARGER

USB powered 1-2 cell LiIon/NiMH battery charger with LCD display from **XTAR** features the most advanced charging technology yet for high power batteries in a compact unit.

Charge up to two LiIon or NiMH cells simultaneously in independent charging channels with LCD status indicators displaying:

1. Battery voltage
2. Battery capacity
3. Charging current
4. Time remaining until charge is complete.

Suits Cell Diameters from AAAA to D Size!

PLUS, charge mobile USB powered devices via 5V 1.0A USB output.

Model: VC2 Plus

BATTERY FIGHTER MINI DUO

Battery Fighter's latest release, the Mini DUO 3 stage automatic SLA charger features **6V/12V selectable voltage** and 500mA output to charge and maintain most types of small capacity lead acid batteries.

Built in intelligent charging and reverse polarity protection makes it safe and easy to use - just set and forget - and keeps batteries charged and ready to go.

Ideal for use with 2Ah - 15Ah capacity VRLA, Gel and AGM lead acid batteries.

The Mini DUO comes with an Australian input plug included but as it accepts world voltage input, the Mini DUO can go wherever you go, with interchangeable regional input plugs for Europe, UK and USA available as optional extras (sold separately).

Specifications:

- Input: 100-240VAC ~50/60 Hz
- Output current: 500mA
- Output voltage: 6V/12V selectable
- Termination: 6.35mm Spades

Model: BSE120506-INT. Suitable replacement for both discontinued MB3516 & MB3517 models.
