

The best of the latest products to get you powered up

MONDIA - CAVALIER FOLDABLE EBIKES

The **Cavalier eBike** is a fun and easy to use battery powered bicycle suitable for young and old. A great way to get around our congested roads or a cruisy way to explore new parts of town, the Cavalier eBike features a simple yet innovative foldable design to make getting on and off public transport easy.

With a key lockable battery and a 250W brushless electric motor, you can choose to ride under your own steam or switch on to 3-speed power assist mode and accelerate up to an impressive 18km per hour!

The Cavalier eBike complies with the specifications of EN15194 vehicle safety standard so no registration is required to ride on Australian roads.

Available in two models, you can exercise when you want, cruise when you need. Get on an eBike!

Each **Cavalier eBike** comes with a 36V lithium ion battery pack with Panasonic cells inside and a lithium ion charger.

For more information on each model, check our website.

ENECHARGER - SMART POWER TOWER

Free up limited power points and the essential USB ports on your laptop or PC for other uses with Enecharger's ingenious **Smart Power Tower** 6 port USB hub.

Smart IC recognition (intelligent charging) automatically identifies a device's optimum charging speed (USB1 and USB2), Apple devices (USB3 and USB4) or Android devices (USB5 and USB6) to maximise full charging speed.

Features

- 6 x Smart IC USB ports.
- 5V 8A max. output.
- World voltage input 100-240VAC.
- Over-heat, over-current, over-charge protection and automatic charging shut off.

Model: SG-P12-AU

MONDIA

FOLDS IN 10 SECONDS!

THE NITTY GRITTY

Specification	SUBURBAN MODEL (WHITE)	LONG RANGE MODEL (BLACK)
Frame:	Aluminium alloy	
Brake System:	Front and rear - TEKTRO disc brakes	
Tyres:	KENDA K909A 12"	
Handle:	Adjustable aluminium handle	
Motor:	AIKEMA 250W brushless (front wheel drive)	
Controller:	HOBAT 36V / waterproof plug	
Max. Speed:	18km/h	
Battery:	36V 9.0Ah Lilon (Panasonic cells)	36V 11.6Ah Lilon (Panasonic cells)
Assistance Level:	3 speed levels	
Max. Rider Weight:	95kg	
Range*:	40 ~ 70km (approx.)	50 ~ 80km (approx.)

* The performance is considered on a level road. The range depends on the combination of a number of factors such as weight, terrain, road surface, tyre pressure, weather conditions, and last but not least, the use of the assist function vs. rider's effort (pedalling). Please note that the battery is a wear part and that the capacity of the battery will decrease over a period of time, thereby affecting the range.

NEW IN TORCHES

XTAR's latest addition features direct charge input via Micro USB for more convenient charging on the go.

The RC1 is a compact torch with 450 lumens of light output and 235m beam range, suitable for general all purpose use.

Powered by 1 x 18650/18700 size lithium ion battery, like the new TB-18650IC35 from **MIBE**, made with the highest capacity 3.5Ah Panasonic cell currently available and IC protection.

Torch Model: RC1 (XTAR).

Battery Model: TB-18650IC35 (MIBE).
